Objet : Notification d'une décision dans le cadre de la certification agriculture biologique

Sir,

The results of the Bordeaux blanc 2021 analysis carried out on 20/12/2022 as part of the certification process in Organic farming, have been studied by our services.

The results are OK.

The results of the Grave Rouge 2020 analysis carried out on 20/12/2022 as part of the certification process in Organic farming, have been studied by our services.

The results show the detection/quantification of phosphonic acid up to 0.27 mg/kg.

The concentration measured is lower than the MRL for wine grapes set by European regulation (EC) 396/2005.

On the other hand, following the investigations we have carried out and upon your return, we have no proof or other suspicion of non-compliant practices, and all precautionary measures have been put in place.

Therefore, the analyzed wines can be marketed with reference to organic farming.

Please accept, Sir, our sincere greetings
